## Career summary

### **Head of IT Platforms Support and Operations** at Informa, Dubai, United Arab Emirates

2022-present

Informa is a British FTSE 100 company with 12,000 employees across 30 countries, company revenue was over 3 billion GBP in 2023. Informa Markets division produces more than 500 international B2B events and exhibitions each year.

#### Achievements:

- Strategized and executed the "follow the sun" support model for the global Application Support team, strategically located in key global hubs. This involved orchestrating support activities including Incident Management, Site Reliability, monitoring of enterprise systems, escalation handling, and requests fulfilment to efficiently support business teams across various time zones.
- Developed procedures to manage Major Incidents, customer escalations, and roster to efficiently manage global team.
- Established a Platform Reliability Center of Excellence to monitor enterprise applications and critical platforms, implementing SRE best practices and New Relic for monitoring, resulting in improved stability and performance of diverse enterprise systems.
- Improved resilience and performance of digital platforms hosting hundreds of sites and web applications by rolling out efficient CDN caching, elevating cached content serving from 20% to 85%.
- Ensuring the ongoing Continuous Service Improvement and cost-effectiveness. Examples: reduced L2 tickets by 10% in 2023 and by another 10% in 2024 by identifying routine well-documented requests and shifting-left to L1 support, planning their further automation; reduced AWS costs by 7% by identifying legacy unused services and decommissioning them.

#### Responsibilities:

- Managing the global application support team of 12 members located in Malaysia, UAE, UK and US offices, supporting business teams (over 2000 users globally).
- Making sure critical enterprise applications are running smoothly, and any service degradation or outage is alerted and efficiently handled by the relevant teams.
- Supporting mission-critical applications and platforms, including 400+ websites on 4 digital platforms, 30 applications in Amazon AWS cloud (includes US and EMEA payment portals with million-dollar transactions monthly, and legacy systems), CI/CD pipelines that are used for release deployment, marketing technology (includes 15 instances of Oracle Eloqua), web analytics solutions, divisional applications, integrations, and others.
- In charge of Major Incident Management and escalations management, post-incident reviews, root cause analysis within scope of Problem Management process.
- Analysing the applications landscape and opportunities to improve the systems, workloads, and processes.
- Reporting on team performance to meet quarterly goals and objectives, analysing trends for workload forecast and capacity planning.

### **IT Application Support Manager** at Informa, Dubai, United Arab Emirates

2019-2022

#### Achievements:

- Achieved and maintained high level of customer satisfaction rate: 97% in 2019, 94% in 2020, 96% in 2021, 95% in 2022.
- Project managed successful migration of 400+ websites to new web tracking platform (from Adobe DTM to Adobe Launch).
- Shaped and trained a very efficient Application Support team supporting Marketing Technology, Digital platforms, other corporate applications.
- Enabled practices to maintain team knowledge base, knowledge sharing, cross-training, upskill and development.

#### Responsibilities:

- Managed the team of 6 Analysts and 2 Team Leads, across UAE, UK, US.
- In charge of Major Incidents management end-to-end and escalations management.
- Led the Incident Management within the division and defining and coordinating the post-incident improvement actions.
- Analysed common issues in enterprise applications within Problem Management framework, identifying root causes and coordinating various divisional teams (Digital Developers, DevOps, TechOps) and managed vendors to fix root causes.
- Managed and controlled changes in applications as Change Manager and Change Authority Board member.
- Kept the support processes and support models up to date.
- Ensured that the team met SLAs and operated at their best by achieving KPIs and following the processes.

### **IT Application Support Team Leader** at Informa, Dubai, United Arab Emirates

2018-2019

#### Achievements:

- Developed metrics to measure team performance and to provide reports to IT Leadership
- Improved quality of team's handling of Incidents and Service Requests by reducing time of tickets assignment and tickets resolution, improving quality of tickets resolution, reducing the backlog

#### Responsibilities:

- Led Incident Management while supporting enterprise applications for marketing and sales.
- Managed the team of Application Support Analysts located in multiple time-zones (UK, US and UAE).
- Co-ordinated internal (DevOps, cross-domain support teams) and external teams (third-party contractors, vendors) in a service integrator capacity while delivering changes in enterprise applications.
- Enforced adherence to Change Enablement process across the IT Support teams.

- Controlled changes in enterprise applications as Change Manager and Change Authority Board member.
- Prioritised tasks for support teams based on customer and business requirements.

#### **IT Application Support Analyst** at Informa, Dubai, United Arab Emirates

2017-2018

##### Achievements:

- Eliminated critical application problems while performing root-cause analysis of issues and analysing integration dataflows among various enterprise marketing systems.
- Increased quality of tickets resolution by training junior team members and auditing their activities.
- Reduced data discrepancy between Database records and Analytics metrics.
- Streamlined Change Enablement processes in several deployment activities for business-critical enterprise applications.

##### Responsibilities:

- Provided high-quality support to business-teams (over 2000 users globally) by implementing Service Requests and resolving Incidents in digital marketing and sales enterprise applications: Adobe Experience Manager, Oracle Eloqua, Adobe Analytics, Salesforce.
- Managed Change process across enterprise applications, enterprise service bus (Mulesoft) and databases (Amazon Redshift, Snowflake).
- Coordinated development and support activities among support teams, DevOps, contractors and vendors (Adobe, Oracle)
- Actively participated in implementation of ITSM processes within the teams (Incident Management, Service Request Fulfilment, Change Management) and development of Enterprise Support Model.
